México digital

De la adopción a la madurez financiera

Marcela Galicia

1 de octubre de 2026

¿Qué ocurre cuando la innovación alcanza escala?

La digitalización cambió el acceso.

La escala cambiará las reglas.

Cinco etapas para entender un mercado en evolución

Acceso

La tecnología abre la puerta
La inclusion se logra con el uso

Los fundamentos de las finanzas digitales se han fortalecido

Conectividad

↑ 1.6x usuarios de internet

Acceso móvil

73% de la población cuenta con smartphone

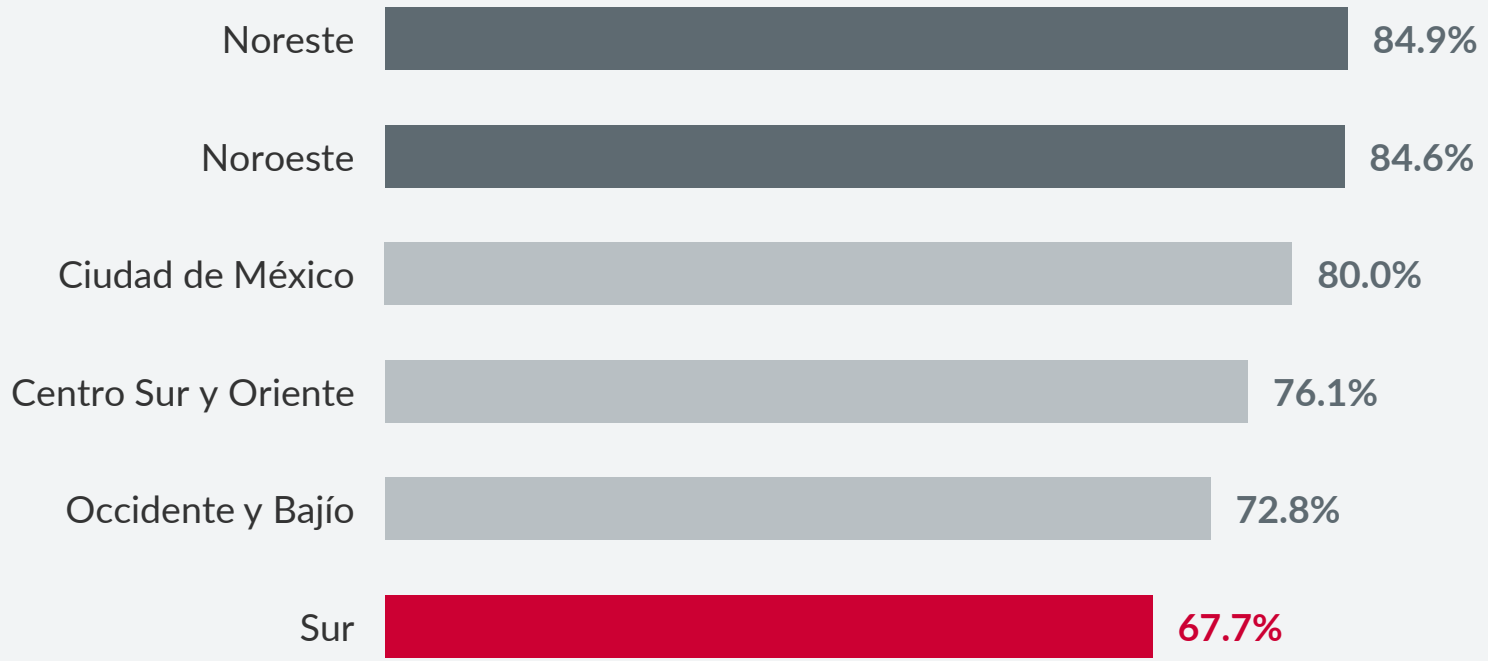

Interacción digital

69% de los cuentahabientes usa aplicaciones móviles para gestionar cuentas

El acceso tecnológico crea las condiciones para avanzar, pero no garantiza por sí solo una mayor inclusión financiera.

Fuente: Elaboración de Fitch Ratings con información de ENIF 2024.

El acceso mejora, pero México sigue avanzando a distintas velocidades

76.5%

de la población cuenta con al menos un producto financiero formal

La inclusión financiera avanza, aunque la evolución sigue siendo heterogénea entre regiones.

Fuente: ENIF 2024. Elaboración de Fitch Ratings.

Adopción
Construyendo hábitos

Los canales digitales se están convirtiendo en infraestructura cotidiana

Uso de aplicación móvil para consultar o gestionar cuentas

Uso de transferencias electrónicas

Más consultas

Más movimientos

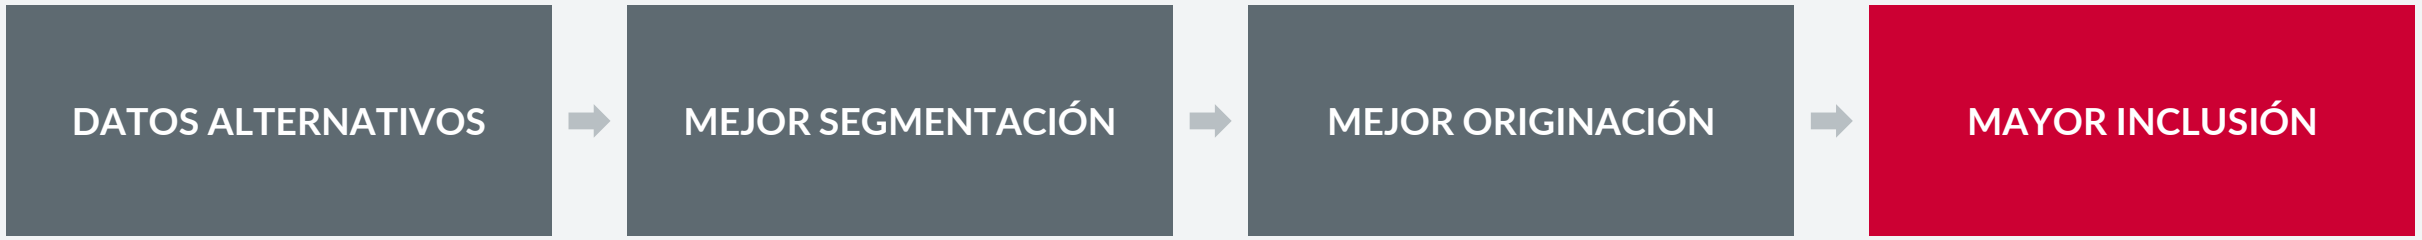

Más pagos

Más interacción digital

El uso mayor complementa los avances observados en acceso.

Fuente: ENIF 2024. Elaboración de Fitch Ratings.

La inclusión va más allá del acceso

Mayor capacidad para evaluar a usuarios con historial crediticio limitado

Más precisión en las decisiones de originación

Mayor capacidad para ampliar el acceso de forma sostenible

La tecnología amplía la inclusión cuando mejora la capacidad para entender, evaluar y administrar el riesgo.

Escala

Alcanzar escala cambia las decisiones

Los participantes digitales son cada vez más relevantes, aunque aún no dominantes

Participación de mercado
Mayo 2026

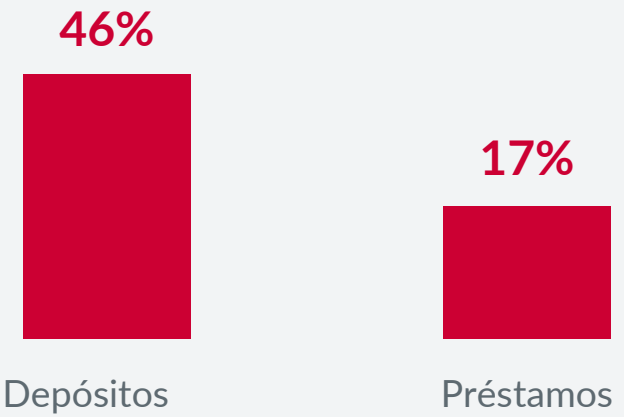

4.0%

Préstamos de consumo

4.6%

Depósitos individuales

Crecimiento acumulado
2024 - mayo2026

La relevancia competitiva está creciendo más rápido que la participación de mercado.

Fuente: Fitch Ratings, Mexican Fintech Q&A y Latin American Fintech Market Update.

La competencia está evolucionando

VENTAJAS TRADICIONALES	VENTAJAS EMERGENTES
Presencia física	**Datos**
Escala	**Experiencia del cliente**
Cobertura geográfica	**Velocidad de respuesta**
Relaciones históricas	**Capacidades digitales**

La competencia evoluciona, pero las ventajas tradicionales y digitales continúan coexistiendo.

La escala genera nuevas preguntas

¿Qué cambia cuando el crecimiento alcanza escala?

FONDEO

¿Es sostenible?

RIESGO

¿Cómo evoluciona?

REGULACIÓN

¿Sigue siendo adecuado el marco regulatorio?

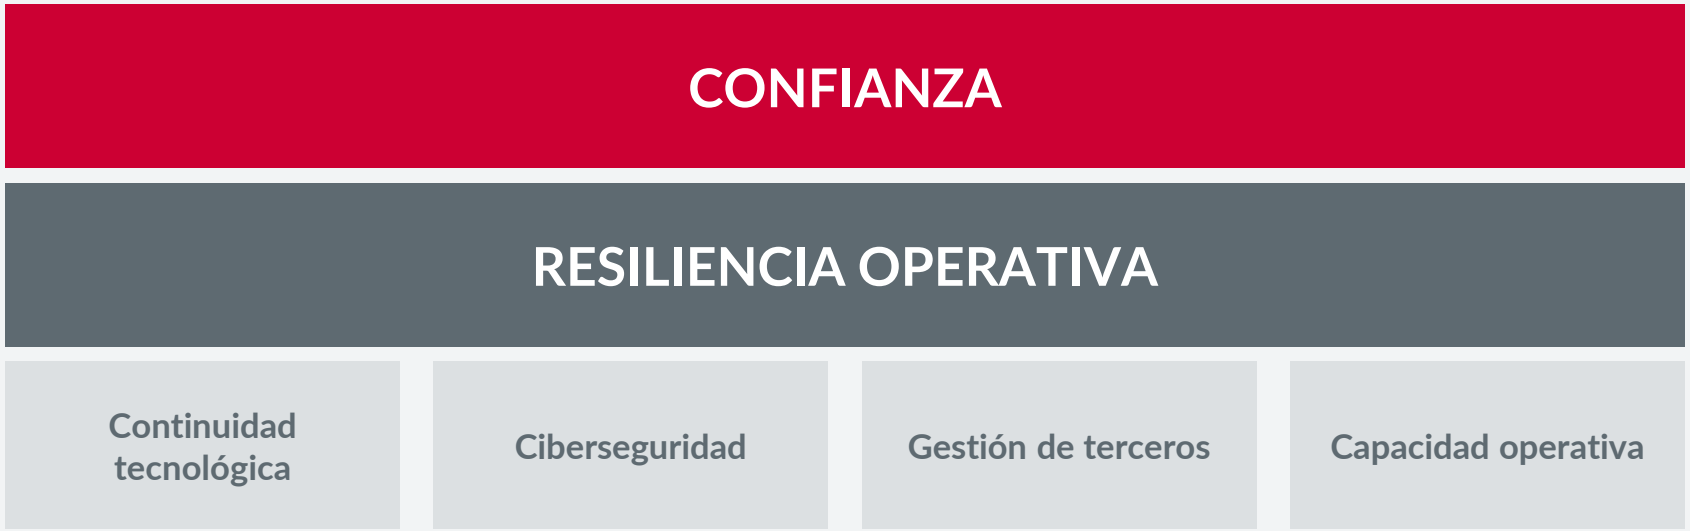

La licencia bancaria es una elección estratégica, no un destino inevitable

BENEFICIOS POTENCIALES	MAYORES EXIGENCIAS
Fondeo más estable	**Más capital**
Mayor amplitud de productos	**Mayores costos de cumplimiento**
Menor dependencia de terceros	**Mayor complejidad operativa**
Fortalecimiento de la confianza	**Controles de riesgo más robustos**

La decisión depende del modelo de negocio, la escala alcanzada y los objetivos estratégicos de cada institución.

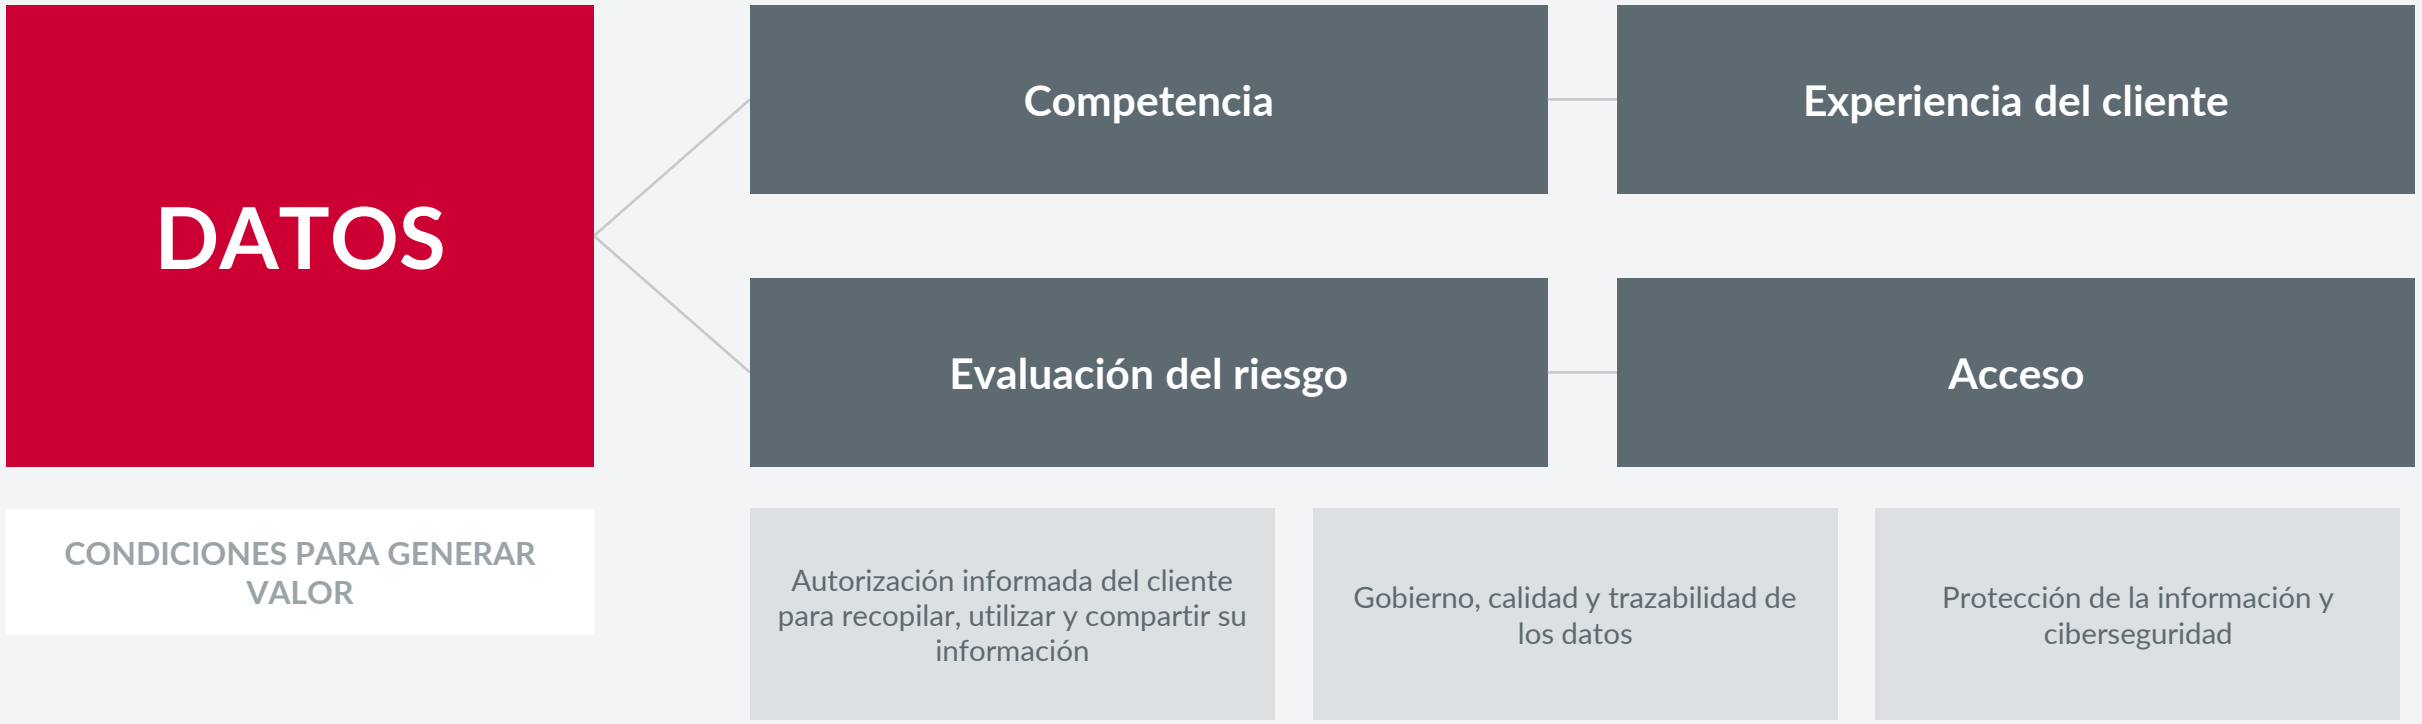

Confianza
La confianza exige resiliencia

La resiliencia operativa importa más a medida que crece la escala

La confianza depende de la capacidad para mantener la operación, proteger la información y responder ante eventos adversos.

Los datos se están convirtiendo en un activo estratégico

Los datos pueden fortalecer la competencia, mejorar la experiencia del cliente y ampliar el acceso financiero, pero su valor depende de la capacidad para administrarlos de forma segura, responsable y consistente.

Madurez

La capacidad institucional importa

El crecimiento no es lo mismo que la madurez

CRECIMIENTO	MADUREZ
Clientes	Gobernanza
Volumen	Resiliencia operativa
Expansión	Fondeo sostenible
Escala	Gestión del riesgo

La madurez incorpora las capacidades necesarias para sostener el crecimiento a través del tiempo y de distintos ciclos económicos.

La escala cambia la ecuación del fondeo

ESTABILIDAD

Capacidad para mantener el acceso al fondeo en diferentes condiciones de mercado

DIVERSIFICACIÓN

Menor dependencia de una sola fuente o grupo de proveedores de recursos

CAPACIDAD DE CRECIMIENTO

Fondeo suficiente para acompañar la expansión del crédito de manera sostenible

No existe una estructura única de fondeo, pero su sostenibilidad se vuelve más importante conforme aumenta la escala.

La historia de la última década fue acceso y adopción.
La siguiente etapa estará definida por resiliencia, confianza y sostenibilidad.

La escala amplía oportunidades.
La capacidad para sostenerlas diferencia a las instituciones.

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: https://www.fitchratings.com/rating-definition-document. In addition, the following details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at https://www.fitchratings.com/understandingcreditratingshttps://www.fitchratings.com/site/regulatory. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third- party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. Fitch Ratings makes routine, commonly-accepted adjustments to reported financial data in accordance with the relevant criteria and/or industry standards to provide financial metric consistency for entities in the same sector or asset class.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US$1,000 to US$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US$10,000 to US$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see https://www.fitchratings.com/site/regulatory), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
